Dear Commissioner Martin;

Docket 07-52, In the Matter of Broadband Industry Practices

Big telecom companies want to twist how the internet works. They want to set up priority service for a fee and second class service for the rest of us. s

Currently FCC rules require equality on the Internet. Delays, when they occur, affect all communication equally. When it is fast, everyone benefits.

Now the big telecom companies want to change the system so that they can charge for priority service.

This is unfair and unnecessary, and it would pander to corporate profit at public expense and will discourage Internet development in the public sector.

The FCC should keep the rules that have worked so well up till now.

Sincerely,

Beverly T. Miller

Dear Sir or Madam:

I am writing to urge the FCC to support Net Neutrality. So many of our rights have been lost within the last twenty-seven years that the freedom of communication over the Internet has kept me sane.

I hope that the FCC will be able to maintain its integrity by supporting the best of the American people, as opposed to the interests of a few mega, global corporations.

Very sincerely yours,
